

**Advanced Donation Program  
Informed Consent Intended Donor**

Version 3.0

# Intended Donors

## Government Issued Photo Identification

Do not submit without photo identification  
All states issue non-driver IDs with no age requirements

The Advanced Donation Program “ADP” allows an acceptable (as determined by the transplant center) Intended Donor “ID” to donate their kidney via human organ paired donation (more commonly referred to as an exchange or a swap) before their Voucher Holder “VH” receives a transplant. Once the ID’s donation has occurred, the VH(s) may be activated by their transplant center for matching by the National Kidney Registry (NKR). I would like to participate in the ADP and I am willing to donate a kidney to a recipient matched through the NKR and understand that my donation will give one of my VHs an opportunity to receive a living donor kidney. I consent to the release of my health, medical, and personal information to the NKR for the purpose of participating in the ADP. I authorize the NKR to disclose, share and use my health, medical and personal information in conducting the ADP, and I waive any and all privacy law claims in the use of this information as part of the ADP. The ADP program is unrelated to the U.S. deceased donor system and participation in the ADP program does not give any wait time points for the VH in the deceased donor system.

**Please initial each line below to confirm that you understand these important program components:**

- The NKR may not be able to find a match for me and I may not be able to donate my kidney through the ADP.
- I may become unsuitable for donation at any time in the process.
- My surgery may be delayed or cancelled at any time due to unforeseen events.
- The NKR may unexpectedly shut down.
- There is no guarantee that my Voucher Holder(s) will be transplanted through the ADP.
- I may name one Voucher Holder (who is expected to be in need a kidney transplant within 1 year) to receive a Voucher OR
- I may name up to 5 VHs (immediate family members who will not need a transplant within 1 year) to receive Vouchers. Once a Voucher is redeemed, the other Vouchers are no longer valid.

Section 1: Complete if Voucher Holder will need a kidney transplant within 1 year - Standard Voucher

Version 3.0

# Voucher Holders

## Government Issued Photo Identification

Do not submit without photo identification  
All states issue non-driver IDs with no age requirements

The Advanced Donation Program “ADP” allows an acceptable (as determined by the transplant center) Intended Donor “ID” to donate their kidney via human organ paired donation (more commonly referred to as an exchange or a swap) before their Voucher Holder “VH” receives a transplant. Once the ID’s donation has occurred, the VH(s) may be activated by their transplant center for matching by the National Kidney Registry (NKR). I understand that my ID would like to participate in the ADP to donate a kidney to provide a voucher for me. This donation gives one Voucher Holder an opportunity to receive a living donor kidney. Although multiple Voucher Holders can be named, only one Voucher can be redeemed. I consent to the release of my health, medical, and personal information to the NKR for the purpose of participating in the ADP. I authorize the NKR to disclose, share and use my health, medical and personal information in conducting the ADP, and I waive any and all privacy law claims in the use of this information as part of the ADP. I understand that this form must be completed and returned at least 3 weeks before the ID's scheduled surgery date. I am willing to undergo the identity verification process if I receive a kidney through this program. I understand that this Voucher is non-transferable, and non-assignable. I understand that I must complete and return a cheek swab test within 3 weeks of receiving the swabs. If I am age 16 or older I must complete the additional screening test within 3 weeks of receiving the screening test email instructions and must repeat the screening every 5 years after the initial test in order to determine my potential for kidney failure. I understand that the voucher certificate will not be provided until the cheek swab and screening tests are completed. The ADP program is unrelated to the U.S. deceased donor system and participation in the ADP program does not give any wait time points for the VH in the deceased donor system.

**Please initial each line confirming that you understand the circumstances which may prevent you from receiving a kidney:**

- Another person, who received a Voucher from my Voucher donor, redeems their Voucher first.
- A situation whereby I become medically unable to undergo transplant surgery.
- NKR’s inability to find an acceptable compatible donor.
- The NKR may unexpectedly shut down.
- Having a blood type of “O” can often delay a match offer for 1 - 2 years or more after activation.
- A sensitization event that increases your NKR cPRA (e.g. blood transfusion, pregnancy, prior transplant, etc.).
- Having an increased NKR cPRA can delay a match offer for 1 - 2 years or more after activation.
- Having an NKR cPRA of ≥ 99% may result in never finding a match.
- Unforeseen circumstances such as an act of nature.
- Your Transplant Center not accepting potential donors, once you are activated for matching.

I am likely to need a kidney transplant within 1 year (Standard Voucher)	_____ YES	_____ NO
I do not expect to need a kidney transplant within 1 year (Family Voucher)	_____ YES	_____ NO
