Message from the Founder & CEO

The first quarter of 2021 concluded with the NKR setting a new monthly record of 105 transplants facilitated in March, surpassing the previous high of 91. As we go to press with this report, we have facilitated over 100 transplants in April, marking our first two months over 100. On the heels of the first two months of 2021, which saw transplants reduced to only 116 due to a high rate of swap failures, the recent volume spikes are an indication that the weight of the pandemic on living donor transplant is beginning to lift.

The Kidney for Life Program, which now has 16 participating centers, gives patients referred from the [Kidney for Life website](#) the opportunity to find a low eplet mismatch donor. In Q1 2021, we successfully facilitated 24 Kidney for Life Transplants, more than doubling the Q4 2020 total of 10.

The microsite program, which provides important donor search tools for patients seeking a living donor, achieved a milestone of 700 active microsites in Q1. We are expecting to have over 1,000 active microsites by the end of 2021, giving patients without a living donor new hope for an opportunity to get off the waitlist.

In Q1, NKR had its highest volume of qualified donors referred to transplant centers of any quarter in its history. With the support and protections offered by [Donor Shield](#), prioritization for a living donor kidney and the Voucher Program; the NKR is removing many of the disincentives to living donation.

We continue to analyze the donor conversion rates at centers across the country to further improve the donation process and remove potential barriers to living donation. Given the large conversion rate variance between centers, there is a significant opportunity to share best practices across the industry and improve the donor experience.

Sincerely,

A handwritten signature in blue ink, appearing to read 'G Hil'.

Garet Hil

Top Center Liquidity Contributors (CLC)

4/1/2020 – 3/31/2021

As of 4/12/2021 14:18:54

The Center Liquidity Contribution ("CLC") program scores Member Centers based on their contribution to the pool liquidity. Centers with positive CLC scores are given matching priority.
