- Transplanted Recipients by cPRA
- Transplanted Recipients Median Wait Time
- Uncoupling Trend Transition from Paired to Standard Voucher Donation
- Vouchers Outstanding
- Wait Time Distribution From Exportability to Transplant
The second quarter of 2021 was the NKR’s largest to date, with a total of 286 transplants facilitated, approximately 10% of which (26 transplants) were low eplet mismatches. The NKR has experienced record volumes beginning in March of this year. Data from the first half of the year indicates that NKR-facilitated transplants now account for 17% of all living donor kidney transplants in the United States, up from 11% in 2019.

The DASH platform has been expanded to include an expert system that helps collect DNA for compatible pairs very early in the donor evaluation process. Based on the donor and patient DNA, the Kidney for Life expert system streamlines the decision-making process, giving compatible pairs visibility to their eplet mismatch information and quantifying the opportunities to upgrade their match through paired exchange.

Donor Shield provided support and protections for approximately 25% of all U.S. living kidney donors in Q2 (414 donors protected). During this quarter, Donor Shield was significantly enhanced and now includes Donor Connect, which gives donor candidates the option to speak with a living kidney donor. We also expanded the maximum lost wage reimbursement from four weeks to six weeks to ensure donors with longer recovery periods are fully supported. Additionally, the maximum travel and lodging reimbursement amount has been increased $1,000—from $2,000 to $3,000.

Qualified donors referred from the NKR to Member Centers increased by 40% over last year and 80% over 2019. This massive growth in donor referrals is a result of the recent improvements to our Center Listing Service website, the partnership with National Kidney Donor Organization (NKDO) to create the Donor Connect program and the replacement of the 24-urine collection requirement with the cystatin-C test, which is a more convenient process for donor candidates.

Sincerely,

Garet Hil  
Founder & CEO
